**ABOUT**

I have helped my students communicate with students in other countries for many years. I think it is very important for students learning foreign languages to work with students in other countries. It is inspiring for students to exchange emails or posters about traditional cultures, school lives, peace, environmental issues and so on with students living in different cultural backgrounds. My students are 1st, 2nd and 3rd year students of Takamori High School. They are 15, 16, or 17 years old in April of 2021. I have 25 to 30 students in one class. As for my plan of topics for my students to write about, they are going to write about self introduction, health, Japanese culture, and peace. If it is possible to exchange our students' mails about one or more topics like these, would you please tell me how many students might be able to join this exchange? I am looking forward to your reply!

Through iEARN, over 2,000,000 students and 50,000 educators are connecting in global project-based learning and virtual exchange activities—learning with the world, not just about it. 3. iEARN values partnerships and welcomes educational, youth service, and development organizations to join us in building a network of opportunities for young people to work together. 'THE PROJECTS' includes two points: 1. iEARN enables students and educators worldwide to design and participate in global projects as part of their regular classroom and after-school programs. 2. In addition to meeting educational goals, all iEARN projects have to answer the question, 'How will this project improve the quality of life on the planet?'. Below these sections is a 'TOUR' button.
